MOVE SEAMLESSLY THROUGH THE RESEARCH PROCESS

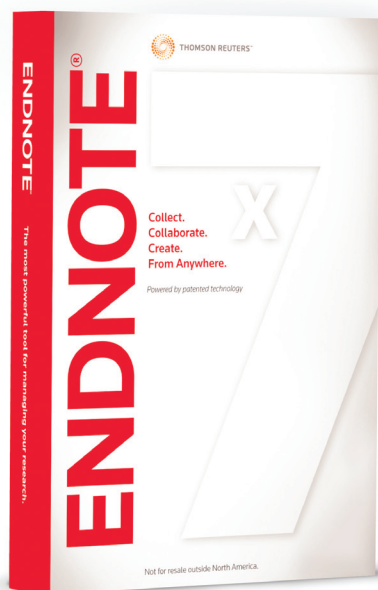

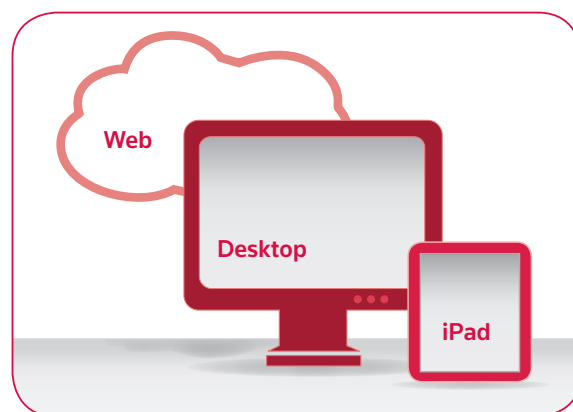

EndNote® gives you the tools to search, organize and share your research, and write your paper. EndNote makes managing research easy for the student writing a term paper, the novice researcher, and the senior professor writing a grant.

On top of the ability to create bibliographies and CVs right from within EndNote, features like **'Find Full Text'** and **'Update Records'** automates the process of locating and updating your collection's information, saving hours of time searching through individual files. **Group sharing capabilities** and read/write options allow you to work with colleagues and even build on each other's work. With EndNote, you can spend less time on the details, and more time on the big picture.
