HZI HELMHOLTZ
Zentrum für Infektionsforschung

Helmholtz Zentrum für Infektionsforschung > Organisation > Bibliothek > Services > Downloads / Sciencetools > Focus Endnote
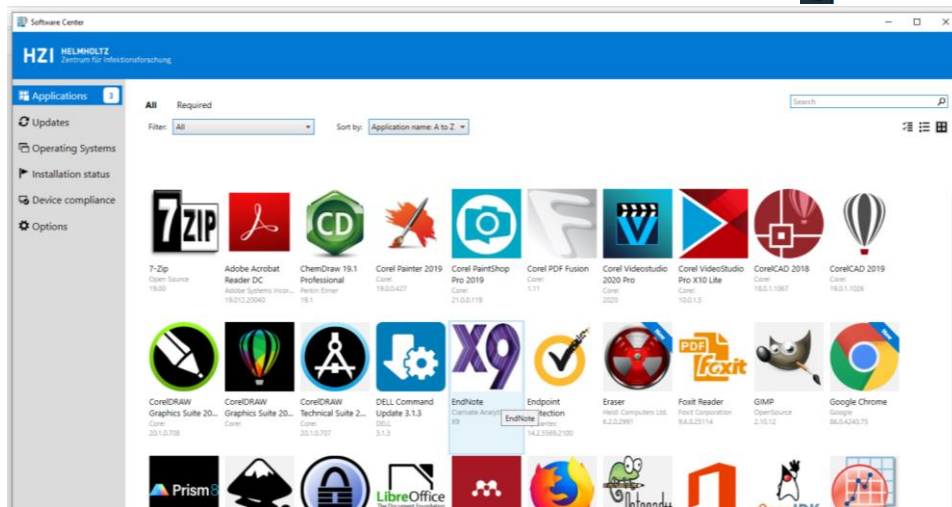

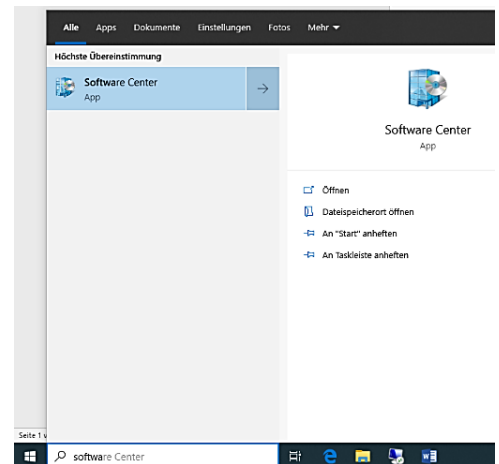

## How to install Endnote from SoftwareCentre

Install Endnote X9 on a computer of HZI via Softwarecenter: search for SoftwareCenter

(C:\ProgramData\Microsoft\Windows\Start Menu\Programs\Microsoft Endpoint Manager\Configuration Manager)

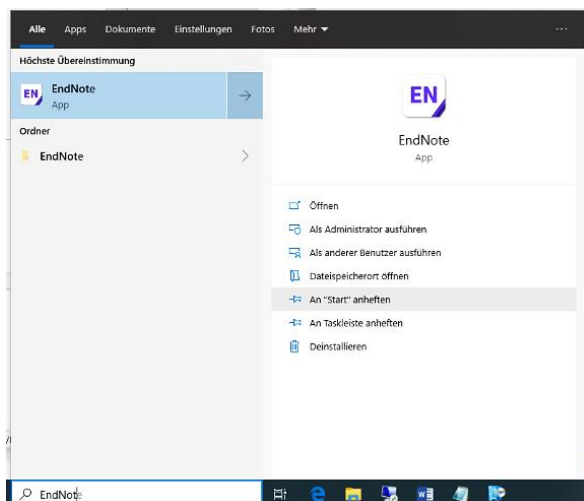

Choose the preferred software (e.g. Endnote) via clicking on it

Click "Install"

After installation you can open Endnote or add it to Start ("An Start anheften") etc.

Due to the campus licence for Endnote it is not possible to install Endnote also on private devices. Please use a trial version from Endnote for an installation on a private device: http://endnote.com/downloads/30-day-trial (the trial version can also be used longer than the mentioned 30 days)

For more information on Endnote and other reference management software please have a look to section 2 and 3 of the link collection https://helmholtz-hzi.bibliotheca-open.de/Services/Links

More details on Endnote: page "Focus Endnote" - If you have further questions please ask us.
Best regards, your HZI Library
